

EDUCATION

Stanford University Master's thesis as Visiting Student Researcher under Prof. Stephen P. Boyd, IEEE Fellow	California, US Feb 2026 - Jun 2026
KTH Royal Institute of Technology M.Sc Computer Science and Engineering (Machine Learning) B.Sc Industrial Engineering and Management (Computer Engineering)	Stockholm, Sweden (GPA 4.9 / 5) Sep 2024 - Jun 2026 (GPA 4.5 / 5) Sep 2021 - Jun 2024
NTU Nanyang Technological University Exchange Programme - GEM Trailblazer	Singapore Jan 2025 - May 2025

PUBLICATIONS

Manuscript under major revision , IEEE Transactions on Vehicular Technology (TVT). Edén Wallberg, O., et al., 'Power-Domain CSI Prediction for Downlink Power Allocation in MIMO-OFDM Systems'.	Submitted Jan 2026
Manuscript in Preparation , targeting IEEE Transactions on Vehicular Technology (TVT). Edén Wallberg, O., et al., 'Power Allocation for FD-RAN Systems using Heuristic-Guided Reinforcement Learning'.	Submission Jan 2027

EXPERIENCE

The University of Tokyo (UTokyo) - Upcoming Visiting Student Researcher under Prof. Bo Qian, IEEE Senior Member Continued collaboration with the research group from NII. AI/ML for Wireless Communication.	Tokyo, Japan Sep 2026 - Dec 2026
National Institute of Informatics (NII) Visiting Student Researcher under Prof. Yusheng Ji, IEEE Fellow - Conducted a research project in AI/ML for power allocation in 6G/NextG systems. - First-author manuscript under major revision at IEEE Transactions on Vehicular Technology (TVT).	Tokyo, Japan Sep 2025 - Dec 2025
Goldman Sachs Summer Analyst (Public Investing Engineering Internship) - Full stack software development on the flagship platform for risk- and asset management. (Angular & Java). - Developed a feature for custom portfolio benchmark selection and presented work to Managing Directors. Return offer extended.	London, UK Jun 2025 - Aug 2025
Greenely Data Scientist (ML & BI) - Developed a forecasting model (LSTM) for charge box power consumption - Deployed model to bid on Svenska Kraftnät FCR-D up market during electricity grid deviations.	Stockholm, Sweden Oct 2023 - Feb 2024

EXTRACURRICULAR

KTH AI Society Research Team Royal Institute of Technology, KTH, Sweden	Joined Feb 2023
Activities and Projects GitHub and Kaggle - Implementation of classic Machine Learning algorithms from scratch in Python (NumPy). - Low-Level Tensor Library in C, implementing broadcasting and tensor operations. - Data Structure implementations in C, strengthening of fundamentals. Linked-List, Binary Tree, Hash-Map. - Kaggle Data Science and Machine Learning Competitions. - Custom chess engine implementation in Python, including bitboard optimisation techniques and AI player.	

COMPETENCIES

Programming Languages	• Python • SQL • C • Java • TypeScript
Python Libraries	• NumPy • Pandas • Matplotlib • Seaborn • Plotly • Streamlit
Machine Learning Frameworks	• PyTorch • TensorFlow & Keras • Scikit-Learn
Version Control & Collaboration	• Docker • GitHub • GitLab
Interests & Hobbies	• Scuba Diving • Chess • Arm Wrestling
